JOB CARD

# Machine & Labor Times

How do you capture today who worked on which machine for how long?

FLEXXLINK MES · JOB CARD

| | |
|---|---|
| 🏭 Machine CNC-01 | 08:00 – 12:30 |
| 👤 Worker M. Smith | 08:00 – 10:15 |
| 👤 Worker J. Miller | 10:15 – 12:30 |

SLIK GJØR DU DET BEDRE

# Machine and labor times – separated and precise

One machine, multiple workers – each with their own time window.

🏭 **Machine Time**
Runtime of the resource

👥 **Labor Time**
Individual time per worker

⏱️ **Timestamps**
Start and end to the second

📊 **Cost Allocation**
Machine costs and labor costs separated

I PRAKSIS

# Job Card Journal with machine and labor

FLEXXLINK MES · JOB CARD JOURNAL

| | |
|---|---|
| 🏭 **Machine CNC-01** | 08:00:00 – 12:30:00 |
| 👤 **M. Smith (Badge 4711)** | 08:00:00 – 10:15:00 |
| 👤 **J. Miller (Badge 4712)** | 10:15:00 – 12:30:00 |

> *Machine time and labor time – captured separately, costed correctly.*

SPØRSMÅL TIL DEG

# How do you capture machine and labor times today?

→ Separated with individual timestamps?

→ Combined as a total?

→ Or only machine time without labor?
