ORDER COMPLETION

Complete Order (BOM)

When an order is finished – how do planned and actual material consumption compare in your system?

FLEXXLINK MES · BOM COMPARISON

Material	Planned	Actual	Variance
RAW-100	50 kg	48 kg	-4%
RAW-200	25 kg	26 kg	+4%

SÅDAN GØR DU DET BEDRE

Order completion with full BOM transparency

Planned vs. actual – in one view, in real-time, per order.

📋 **BOM Comparison**
Planned consumption vs. actual consumption

📦 **Inventory Reconciliation**
Materials booked, finished goods in stock

✅ **Status "Completed"**
Order cleanly closed in Dynamics 365

I PRAKSIS

Order completed – all data reconciled

FLEXXLINK MES · ORDER COMPLETION

COMPLETED

Position	Planned	Actual	Warehouse
RAW-100	50 kg	48 kg	WH-01
RAW-200	25 kg	26 kg	WH-01
RAW-300	10 pcs	10 pcs	WH-02
FG-1000	**100 pcs**	**100 pcs**	**FG-WH**

> *One API call – order closed, materials booked, finished goods in stock.*

SPØRGSMÅL TIL DIG

How do you complete production orders in your system?

→ Automated with BOM comparison?

→ Manual check of every line?

→ Or just "close without checking"?
