PRODUCTION START

Production start in real-time

How fast does your ERP know that production is running on the machine? Seconds, minutes – or only at end of day?

ORDER STATUS

- ✓ Released
- ✓ Started
- … Reported as finished

HERE'S HOW IT WORKS BETTER

One API call – and Dynamics 365 knows

Production Start sets the order status in real-time and can optionally consume material.

⚡ Immediate status change

MES starts, Dynamics 365 posts – in real-time

📦 Optional material consumption

Auto-BOM-Consumption configurable per Posting Profile

✅ Validation before posting

Order status and quantities are checked

📊 Workspace transparency

Every start is immediately visible and traceable

TIME COMPARISON

From machine to ERP – how long does it take?

FLEXXLINK MES · COMPARISON

MANUAL / BATCH		WITH REAL-TIME API
4-8 hours	→	**<1** second

🏭 MES sends start → ✅ Validation → 📊 Dynamics 365 posted

Real-time transparency enables better decisions in planning and scheduling.

QUESTION FOR YOU

How long does it take until a production start is visible in your ERP?

→ Instantly via API?

→ Hourly via batch?

→ Or manually at end of day?

Share your approach in the comments!
