VALIDATION

Ensure Data Quality

How do you ensure that MES data is complete and correct before posting?

FLEXXLINK MES · VALIDATION

✅ Order exists	OK
✅ Item valid	OK
✅ Quantity plausible	OK
❌ Batch exists	ERROR

ECCO COME FUNZIONA MEGLIO

Validate before posting – not after

Errors detected before they reach the ERP are errors that don't need to be corrected.

🛡️ **Validation Framework**
Configurable rules per endpoint

🚫 **Block Invalid Data**
No posting without passing validation

📋 **Detailed Error Messages**
What's wrong, why, how to fix

IN PRATICA

Validation Framework in action

FLEXXLINK MES · VALIDATION FRAMEWORK

✅ Order P-2024-0815 exists	**OK**
✅ Item FG-1000 valid	**OK**
✅ Quantity 250 ≤ remaining	**OK**
❌ Batch LOT-9999 exists	**ERROR**

⚠️ **POSTING BLOCKED – Validation failed**

> *Errors detected before posting – not discovered at month-end.*

DOMANDA PER VOI

How do you ensure data quality in your MES integration?

→ Validation before posting?

→ Cleanup after posting?

→ Or hope for the best?

Condividete il vostro approccio nei commenti!
