PROCESS MANUFACTURING

Formula, Co-Products & By-Products

How do you report batch orders with multiple output products to Dynamics 365?

BATCH ORDER OUTPUT

- 🧪 Main product **FORMULA**
- 📦 Co-Product A **CO**
- 📦 Co-Product B **CO**
- ♻️ By-Product **BY**

HERE'S HOW IT WORKS BETTER

All outputs in one call – cleanly separated

In batch orders with formulas, multiple products emerge simultaneously. The API supports this fully.

🧪 **Formula support**
Batch orders with recipe and scaling

📦 **Report co-products**
Multiple main products with own quantities and batches

♻️ **Track by-products**
Post and track by-products separately

🏷️ **Batches per output**
Every product with its own batch number

IN PRACTICE

Batch order with formula – all outputs at a glance

FLEXXLINK MES · BATCH ORDER B-2024-0312

Formula: CHEM-MIX-500
Batch size: 1,000 kg

OUTPUT PRODUCTS

MAIN	Product A – Premium Grade	**800 kg**
CO	Co-Product B – Standard	**150 kg**
BY	By-Product C – Recovery	**50 kg**

Process manufacturing fully mapped – from input to all outputs.

QUESTION FOR YOU

How do you report batch orders with co- and by-products today?

→ All outputs in one report?

→ Each product separately?

→ Or manually entered in the ERP?
