INTEGRATION SERIES

MES meets Dynamics 365

How does data get from your shop floor into your ERP today – and how much of it actually arrives?

248	245	242	3
received	validated	posted	pending

SÅDAN GØR DU DET BEDRE

When shop floor and ERP speak the same language

MES integration is more than just data transfer. It's about real-time, validation, and transparency.

⚡ **Real-time connection**
No batch jobs, no delays

✅ **Validation before posting**
Errors are detected before they reach the ERP

📊 **Full transparency**
Every message traceable in D365

I PRAKSIS

248 messages – what happens to them?

FLEXXLINK MES · LIVE STATUS

Received	Validated	Posted	Pending

> *Every message visible – from receipt to posting in Dynamics 365.*

SPØRGSMÅL TIL DIG

How transparent is your MES-ERP connection today?

→ Can you trace every message?

→ Do you know immediately when something fails?

→ Or do you only find out in month-end closing?

Share your experience in the comments!
