PRODUCTION START

Real-time Production Start

How long does it take in your company until a production order is visible as "Started" in the ERP?

TIME COMPARISON

Manual / Batch		Real-time API
4-8h	→	**<1s**

THIS IS HOW IT WORKS BETTER

The MES starts – the ERP knows immediately

Real-time means: The status change happens in the same second.

⚡ **Instant Status Update**
Production order changes to "Started"

📦 **Automatic Backflush**
Materials are picked at order start

📊 **Planning Always Current**
Capacity planning reflects reality

IN PRACTICE

From manual batch to real-time

FLEXXLINK MES · PRODUCTION START

❌ Manual / Batch	✅ Real-time API
• Worker notes on paper	• MES sends start signal
• Entered at shift end	• API validates immediately
• Batch job runs at night	• Status updates in D365
4–8 hours delay	**<1 second**

> *Real-time means: The status change happens in the same second.*

QUESTION FOR YOU

How fast does a production start arrive in your ERP today?

→ Within seconds via API?

→ Once per hour via batch?

→ Or manually at the end of the day?
